

FIM E-XPLORER RACE 1 - SPAIN (BARCELONA)

This weekend was the launch of the new FIM E-XPLORER World Championship.

A new format focused on electric 2 wheels, with a mixed team composed of 1 man and 1 woman that will ride in the most beautiful places in the world, inside cities and in nature.

The 1st race took place in Spain, in the Barcelona area.

8 teams were present for the launch including 4 EM bikes in 2 different teams.

EM Factory Team represented by our EM rider Chris BRUAND and Marine LEMOINE & SEVEN Stewart Racing with both riders Spenser WILTON and Louise FORSLEY.

We are so proud that the motocross legend James STEWART made the choice of EM bikes for his team. It means a lot to us as a French constructor specialised in the electric powertrain for more than 10 years now. This 1st race was on a motocross track with big jumps so we were quite worried and concerned about the track format in front of our bikes profile.

P2 for EM FACTORY TEAM

We were the 1st to enter in the qualification and finished with the 2nd best time!

After the elimination of the GRAVITY Team in the quarter final, we had a successful win in the semi final against PCR E-Performance team in only 2 rounds, then we made the final against the MIE Racing team owned by Midori MORIWAKI. MIE Racing Team with Sandra GOMEZ and Jorge ZARAGOZA were faster than us with some electric machines more adapted for motocross than our EM bikes.

We are very happy and proud of the results of our 2 riders as it was not the "best" field for our EM bikes.

Next round will take place in Switzerland, Crans Montana on June 24th and we hope to find a difficult track to showcase the performance and efficiency of our EM bikes in the technical parts. Thanks to the FIM E-XPLORER organisation for making this happens, thanks to our amazing riders Chris BRUAND & Marine LEMOINE for always being on top in those very difficult conditions, thanks to the SEVEN James STEWART Racing team including riders Spenser WILTON & Louise FORSLEY for their trust and kindness & thanks to all our sponsors that support us on this crazy championship and adventure!

See you in Switzerland on June 24th!

Chris BRUAND - EM Rider

"Very positive opening of the championship despite the MX track! I hope that the next events will be more technical as in the various tests ivers the past 2 years?"

The whole EM Factory Team gave its best to make sure that we have the best electric motorcycle and to put us in the best conditions.

Many thanks to them!
Congratulations to Marine, my team mate, who rode very well and was 200% invested. We're all so motivated for the next meeting in Crans Montana."

EM FACTORY TEAM

Marine LEMOINE - EM Rider

"A big thanks to all the EM staff for the work and the follow-up throughout the race. It was a world premiere, a duo with Chris Bruand, the best teammate!"

The results are great! It was an incredible experience and I can't wait to see the rest."

Marc COLOMER - Team Manager

"Very good performance of our team and pilots for the 1st round of the FIM E-Xplorer Championship. This 1st round was unknown for all, with respect to the track, etc..."

This makes the result even more important, and it motivates us to keep improving for the future.

Thanks to all our partners, collaborators and all the EM staff."
